Index of Papers Published in Journal of Spacecraft and Rockets

Volume 1—January through December 1964

Issue	Pages
January-February	1–128
March-April	129–224
May-June	225–352
July-August	353–448
September-October	449–576
November-December	577–704

EN, TC, and SA indicate Engineering Note, Technical Comment, and Survey Article, respectively.

AUTHORS

Abramson, H. Norman and Garza, Luis R. Some measurements of the effects of ring baffles in cylindrical tanks (EN) 560
Abu-Romia, M. M. (see Tien, C. L.)
Akerlof, G. C. Feasibility of regeneration of carbohydrates in a closed-circuit respiratory system 303
Alexander, R. V. and Fournier, C. A. Cost and performance considerations in the selection of structural materials for ultra-large-size booster motors 62
Allen, Ralph W. Cost minimization of a space system by multiple launchings (EN) 112
——Reply by author to D. J. Zigrang (TC) 448
Anderson, James T. (see Chao, George T. Y.)
Armstrong, J. M. Landing loads for ocean-recovered rocket boosters: reply by author to G. Stoffmacher (TC) 223
Baker, Alan B. Approximate payload capabilities of boosters for planetary missions (EN) 439
Banas, Conrad M. (see Pinsley, Edward A.)
Barnes, D. R. (see Sevik, M.)
Batchelor, James D. (see Olcott, Eugene L.)
Beale, Robert J., Speiser, Evelyn W., and Womack, James. R. Electric space cruiser for high-energy missions 19
Beauregard, Raymond L. and Sharn, Charles F. Correlation for maximum pressure of "High-Lo" igniter (EN) 676
Becker, Herbert. Design of cylinder-cone intersections (EN) 120
Beckwith, W. C. and Johnson, H. L. Advanced space mission capabilities of nuclear rockets 414
Bentley, Richard M. and Owens, Albert T. SYNCOM satellite program 395
Bert, Charles W. Buckling of a slender prismatic rod at high impact velocity (EN) 569
Bizjak, Frank, Oki, Chres, Hines, William J., and Simkin, Donald J. Analysis of stored gas pressurization systems for propellant transfer. 103
Black, Raymond J. Quadrupedal landing gear systems for spacecraft 196
Black, Sydney D. Space-debris hazards of interplanetary exploration. 317
Blair, Harold (see Carrell, Ted R.)
Bland, Jerrel G. (see LeCompte, George W.)
Boucher, Roland A. Electrical propulsion for control of stationary satellites 164
——(see Olson, Robert N.)
Bransford, James W. (see Gayle, John B.)
Broach, B. G. (see Datis, Angelo)
Broding, William C., Diederich, F. W., and Parker, Philip S. Structural optimization and design based on a reliability design criterion. 56
Brogan, J. J. (see Vliet, G. C.)
Brown, Clyde O. (see Pinsley, Edward A.)
Budurka, William J. and Pleszkoch, Norman L. Lunar landing guidance using cross-product steering (EN) 431
Buna, Tibor. Thermal aspects of long-term propellant storage on the moon 484
Bunt, E. A. (see Raezer, S. D.)
Burke, Thomas J. Radar video data handling (EN) 118
Byrne, William M., Jr. (see Krzycki, Leroy J.)
Carpenter, H. J. (see Morizumi, S. J.)
Carrell, Ted R. and Blair, Harold. Elastomeric seals in hard vacuum (EN) 113
Chamberlin, James A. and Rose, James T. Gemini rendezvous program 13
Chao, George T. Y., Jacobsen, John A., and Anderson, James T. Transient surface temperatures in rocket nozzles (EN) 219
Chapman, John H. Alouette topside sounder satellite: experiments, data, and results (EN) 684
Chu, Hugh N. Application of Biot's variational method to convective heating of a slab (EN) 686
Chu, S. T. (see Stern, R. G.)
Coate, Robert E. (see Lessing, Henry C.)
Coulbert, Clifford D. Selecting cooling techniques for liquid rockets for spacecraft (SA) 129
Coultas, T. A. (see Gessner, F. B.)
Craig, Samuel E. (see Dickey, Frank R., Jr.)
Datis, Angelo, Broach, B. G., and Yen, H. H. Heat transfer in the vicinity of two-dimensional protuberances (EN) 678
Davis, Henry and Novosad, Robert. Control, replenishment, and stability of life support systems 96
DeBiase, R. G. Gridding of satellite observations 160
Dembrow, D. W. and Jamieson, L. B. Theoretical vs actual Nike-Apache sounding rocket performance (EN) 221
—— **and Sorgnit, E. F.** Fin temperature measurements: Nike Cajun sounding rocket (EN) 559
Denham, Walter F. Range maximization of a surface-to-surface missile with in-flight inequality constraints 78
Dershin, H. and Shook, R. G. Rapid technique for calculating times of maximum thermal stress in simple shapes (EN) 571
Dickey, Frank R., Jr. and Craig, Samuel E. Bi-static correlation radar for velocity sensing in spacecraft 508
Diederich, F. W. (see Broding, William C.)
Dingwell, I. W. Design guides for tapered transition sections for pressure vessels (EN) 115
Dorn, John E. and Mitchell, Jack B. Impact of dislocation theory on engineering 48
Ducati, Adriano C., Humpal, Harold, Meltzer, Joseph, Muehlberger, Erich, Todd, James P., and Waltzer, Herman. 1-kw arcjet-engine system-performance test 327
Dugger, G. L. A new journal and its editors 1
——(see Perini, L. L.)
Duncan, Robert Clifton and Gunnersen, Alf S., Jr. Inertial guidance, navigation, and control systems (SA) 577
Dunmire, G. Fred (see Lopresti, LeRoy P.)
Dunn, Michael G. Effects of three-dimensional roughness elements on boundary-layer transition and aerodynamic heating 68
Eastman, J. M. (see Salemka, R. M.)
Egger, Carl T. (see Gayle, John B.)
Ehricke, Krafft A. Economy of large launch vehicles including orbital labor cost 611
Engelberger, J. F. Space propulsion by magnetic-field interaction (EN) 347
Ericson, William B. and Maciulaitis, Algirdas. Investigation of magnetohydrodynamic flight control 283
Fan, Liang-Tseng and Wan, Chee-Gen. Weight minimization of a step rocket by the discrete maximum principle (EN) 123
Feild, Alexander L., Jr. Analytical studies of beryllium ablation and redispersion during re-entry 31
Fifer, S. (see Hurwicz, H.)
Filias, G. (see Steeg, C. W., Jr.)
Fournier, C. A. (see Alexander, R. V.)
Frenzl, O. Hot-water ejectors for engine test facilities 333
Galloway, A. J. (see Wadleigh, K. H.)
Garner, H. Douglas (see Reid, Henry J. E., Jr.)
Garza, Luis R. (see Abramson, H. Norman)
Gayle, John B., Egger, Carl T., and Bransford, James W. Freezing of liquids on sudden exposure to vacuum 323
Gessner, F. B., Seader, J. D., Ingram, R. J., and Coultas, T. A. Analysis of self-cooling with infiltrated porous tungsten composites 643
Gibby, Howard. Ignition transient control through inhibiting of propellant grain (EN) 692
Gilvarry, J. J. and Sowle, D. H. Manned space station orbiting in the Van Allen belt (EN) 127
Glassman, Arthur J. and Stewart, Warner L. Thermodynamic characteristics of Brayton cycles for space power 25
Goldberg, Edwin A. TIROS preflight testing and postlaunch evaluation 374
Gray, Philip D. Storability design criteria for space propulsion (EN) 340

SUBJECTS

AERODYNAMICS OF BODIES, COMBINATIONS, AND INTERNAL FLOW

Effect of aerodynamic drag on low-thrust ascending-spiral trajectories. Chong-Hung Zee (EN) 435
Dynamic stability testing in a Mach-14 blowdown wind tunnel. Otto Walchner, Frank M. Sawyer, and Stephen J. Koob (EN) 437

ASTRONOMY AND ASTROPHYSICS

Requirements for efficient Mars launch trajectories. Lars F. Helgostam 539
Spinning vehicle nutation damper. K. H. Wadleigh, A. J. Galloway, and P. N. Mathur 588
Velocity requirements and re-entry flight mechanics for manned Mars missions. E. Brian Pritchard 605
Venus swingby mode for manned Mars missions. Robert L. Sohn (EN) 565

AUXILIARY SYSTEMS

Thermodynamic characteristics of Brayton cycles for space power. Arthur J. Glassman and Warner L. Stewart 25
Integration of cryogenic dynamic power system with vehicle cooling system. Gerald L. McArthur and James H. Tarter 149
Solar energy thermionic electrical power supplies. W. R. Menetrey and A. Smith 659

COMMUNICATIONS

Bi-static correlation radar for velocity sensing in spacecraft. Frank R. Dickey Jr. and Samuel E. Craig 508
Effects of various re-entry vehicle parameters on radio frequency attenuation. F. A. Vicente 653
Radar video data handling. Thomas J. Burke (EN) 118

FACILITIES, RESEARCH AND SUPPORT

Recent developments in wind-tunnel testing techniques at transonic and supersonic speeds. Rudolph W. Hensel (SA) 449
Hot-water ejectors for engine test facilities. O. Frenzl 333
TV missile terminal-flight simulator. LeRoy P. Lopresti and G. Fred Dunmire (EN) 345

FLUID DYNAMICS

Effects of three-dimensional roughness elements on boundary-layer transition and aerodynamic heating. Michael G. Dunn 68
Chemical nonequilibrium effects in hypersonic pure air wakes. Michael Lenard and Maurice E. Long 290
Freezing of liquids on sudden exposure to vacuum. John B. Gayle, Carl T. Egger, and James W. Bransford 323
Mixing in turbulent axially symmetric free jets. Gdalia Kleinstein 403
Shock reflection and interaction at hypersonic speeds. Sannu Molder and Edward J. Szpiro (EN) 688
Hydrodynamic impact of conical-nosed vehicles during vertical water entry. George Stoffmacher (TC) 222
Landing loads for ocean-recovered rocket boosters: reply by author to G. Stoffmacher. J. M. Armstrong (TC) 223

GEOPHYSICS

Space-debris hazards of interplanetary exploration. Sydney D. Black 317
Design of a separating high-altitude probe. M. Sevik, L. L. Mitchum, and D. R. Barnes 649

HEAT TRANSFER AND THERMODYNAMICS

Charring ablators on lifting entry vehicles. E. Arnold Reinikka and Philip B. Wells 73
Multidimensional ablation and heat flow during re-entry. H. Hurwicz, S. Fifer, and M. Kelly 235
Thermal similitude studies. Billy P. Jones 364
Analysis of movable louvers for temperature control. Joseph A. Plamondon 492
Free-flight investigations of subliming ablators and transpiration cooling at hypersonic velocities. Thomas E. Walton Jr., Bernard Rashis, and Clyde W. Winters 498
Thermal radiation from the exhaust plume of an aluminized composite propellant rocket. S. J. Morizumi and H. J. Carpenter 501
Stratified layer flow model: a numerical approach to liquid temperature stratification. G. C. Vliet, J. J. Brogan, T. S. Sheppard, F. H. Morse, and F. L. Hines 666
A method of calculating rocket plume radiation to the base region. C. L. Tien and M. M. Abu-Romia (EN) 433
Rapid technique for calculating times of maximum thermal stress in simple shapes. H. Dershin and R. G. Shook (EN) 571
Heat transfer in the vicinity of two-dimensional protuberances. Angelo Datis, B. G. Broach, and H. H. Yen (EN) 678
Application of Biot's variational method to convective heating of a slab. Hugh N. Chu (EN) 686

INSTRUMENTATION AND PHOTOGRAPHY

Gridding of satellite observations. R. G. DeBiase 160
Fluxgate magnetometer for space application. S. C. Ling 175

LIFE SCIENCES

Gaseous environment during space missions. Frank J. Hendel (SA) ... 353
Control, replenishment, and stability of life support systems. Henry Davis and Robert Novosad 96
Biologistics for a manned space station based on the metabolic approach. William L. S. Wu and Mahmoud M. Yakut 204

Feasibility of regeneration of carbohydrates in a closed-circuit respiratory system. G. C. Akerlof ... 303
Atmospheric toxicants in manned space stations. Tom Weber (EN) ... 122
Waste-combustion and water-recovery system. Martin Macklin (EN) ... 349

MACHINE ELEMENTS AND PROCESSES

Review of static seals for cryogenic systems. R. F. Robbins and P. R. Ludtke ... 253
Elastomeric seals in hard vacuum. Ted R. Carrell and Harold Blair (EN) ... 113

MATERIALS, METALLIC

Refractory metal alloys in sheet form: availability, properties, and fabrication. T. E. Tietz and R. A. Perkins (SA) ... 225
Analytical studies of beryllium ablation and dispersion during re-entry. Alexander L. Feild Jr. ... 31
Cost and performance considerations in the selection of structural materials for ultra-large-size booster motors. R. V. Alexander and C. A. Fournier ... 62
Failure mechanisms in dense tungsten alloy rocket nozzles. Eugene L. Olcott and James D. Batchelor ... 635
Analysis of self-cooling with infiltrated porous tungsten composites. F. B. Gessner, J. D. Seader, R. J. Ingram, and T. A. Coultas ... 643

MATERIALS, NONMETALLIC

Stiffness and buckling in filament-wound motors. Richard Ravenhall. 260
Secondary reinforcing systems for Spiralloy structures. Victor G. Parady ... 264
Ultra-lightweight, highly efficient, high-temperature, thermal-insulation system. Bertram Klein (EN) ... 352

MATHEMATICS

Computer method for perspective drawing. H. R. Puckett ... 44
Optimization of random satellite systems through the use of integer programing techniques. Nathan Tonelson and Mark Wall (EN) ... 563

METEOROLOGY

Problems of atmospheric wind inputs for missile and space vehicle design. James R. Scoggins and William W. Vaughan ... 181

NAVIGATION AND GUIDANCE

Inertial guidance, navigation, and control systems. Robert Clifton Duncan and Alf S. Gunnersen Jr. (SA) ... 577
Fine guidance sensor for high-precision control of the OAO. Norman A. Gundersen ... 91
Lunar landing and long-range earth re-entry guidance by application of perturbation theory. Henry C. Lessing, Phillips J. Tunnell, and Robert E. Coate ... 191
Improvement in Doppler navigator performance through spectral compression. Ralph G. McManus and James C. Rand ... 388
Results of studies on a twin-gyro attitude-control system for space vehicles. Armando E. Lopez, Jack W. Ratcliff, and Jerry R. Havill ... 399
Precursor orbital guidance. W. C. Hailey, P. Mosner, and W. E. Vander Velde ... 520
Simply mechanized attitude control for spinning vehicles. George W. LeCompte and Jerrel G. Bland ... 593
Missile attitude stabilization by Lyapunov's second method. Antony W. Merz ... 598
Explicit rendezvous guidance mechanization. Thomas L. Gunckel II (EN) ... 217
Miniguide—a simplified attitude control for spin-stabilized vehicles. Henry J. E. Reid Jr. and H. Douglas Garner (EN) ... 342
Lunar landing guidance using cross-product steering. William J. Budurka and Norman L. Pleszkoch (EN) ... 431
Gyroscopic attitude stabilization. Ronald L. Huston (EN) ... 562
Nutational stability of an axisymmetric body containing a rotor. Vernon D. Landon and Brian Stewart (EN) ... 682

PHYSICS, GENERAL

Impact of dislocation theory on engineering. John E. Dorn and Jack B. Mitchell ... 48

PHYSICS, PLASMA

Investigation of magnetodydrodynamic flight control. William B. Ericson and Algirdas Maciulaitis ... 283
Hall-current accelerator utilizing surface contact ionization. Edward A. Pinsley, Clyde O. Brown, and Conrad M. Banas ... 525

PROPELLANTS AND COMBUSTION

Analysis of stored gas pressurization systems for propellant transfer. Frank Bizjak, Chres Oki, William J. Hines, and Donald J. Simkin ... 103
Subcritical, controlled-ullage, cryogenic tankage concept. Clifford N. Hall ... 370
Re-entry behavior of zirconium hydride-uranium fuel elements. Fred E. Littman ... 421
Thermal aspects of long-term propellant storage on the moon. Tibor Buna ... 484
Equivalent inert weights for consumable rocket materials. R. M. Salemka and J. M. Eastman (EN) ... 213
Correlation for maximum pressure of "High-Lo" igniter. Raymond L. Beauregard and Charles F. Sharn (EN) ... 676
Ignition transient control through inhibiting of propellant grain. Howard Gibby (EN) ... 692

PROPULSION

Selecting cooling techniques for liquid rockets for spacecraft. Clifford D. Coulbert (SA) ... 129
Electric space cruiser for high-energy missions. Robert J. Beale, Evelyn W. Speiser, and James R. Womack ... 19
Thrust and impulse requirements for jet attitude-control systems. V. E. Haloulakos ... 84
Scale model testing of 90° supersonic turn ejector systems for altitude simulation. R. E. Nelson, G. O. Patmor, B. L. McFarland, and B. Mandell ... 108
Prediction of design reliability of very large solid-rocket motors. P. Kluger ... 139
Fuel-containment requirements for gaseous-fuel nuclear rockets. Robert V. Meghreblian ... 143
Application of d.c. plasma arc heating to hypersonic propulsion testing. S. D. Raezer, E. A. Bunt, and H. L. Olsen ... 155
Electrical propulsion for control of stationary satellites. Roland A. Boucher ... 164
Ion propulsion system for stationary-satellite control. Jerome H. Molitor ... 170
Hypothetical fusion propulsion rocket vehicle. J. L. Hilton, J. S. Luce, and A. S. Thompson ... 276
1-kw arcjet-engine system-performance test. Adriano C. Ducati, Harold Humpal, Joseph Meltzer, Erich Muehlberger, James P. Todd, and Herman Waltzer ... 327
Influence of injectant properties for fluid-injection thrust vector control. R. E. Walker and M. Shandor ... 409
Advanced space mission capabilities of nuclear rockets. W. C. Beckwith and H. L. Johnson ... 414
Preliminary design of a solar-electric test satellite. Robert N. Olson and Roland A. Boucher ... 471
Radioisotope propulsion. Jacob B. Romero ... 532
Thrust vector control by liquid injection into rocket nozzles. Robert Sehgal and Jain-Ming Wu ... 545
Preliminary study of air augmentation of rocket thrust. L. L. Perini, W. E. Wilson, R. E. Walker, and G. L. Dugger ... 626
Weight minimization of a step rocket by the discrete maximum principle. Liang-Tseng Fan and Chee-Gen Wan (EN) ... 123
Transient surface temperatures in rocket nozzles. George T. Y. Chao, John A. Jacobsen, and James T. Anderson (EN) ... 219
Correlations for theoretical rocket thrust with shifting expansion. Leonard Greiner (EN) ... 339
Storability design criteria for space propulsion. Philip D. Gray (EN) ... 340
Space propulsion by magnetic-field interaction. J. F. Engelberger (EN) ... 347
Fission-fragment-caused shear stress in gaseous vortex reactors. D. B. Harmon and E. M. Svaton (EN) ... 444
Apparent anomalies in correlations for theoretical rocket thrust with shifting equilibrium. Leonard Greiner (EN) ... 446
Optimization of ion engine control systems for synchronous satellites. Jerome H. Molitor and Marshall H. Kaplan (EN) ... 557
Nuclear-thermal vs chemical drives for super-orbital velocities. R. Sandri (EN) ... 568
Experimental evaluation of solid propellant rocket motors under acceleration loads. John G. Horton II (EN) ... 673
Erratum: "Correlations for theoretical rocket thrust with shifting expansion." Leonard Greiner (TC) ... 571

SPACE RADIATION

Design criteria for a manned space-laboratory environmental-control system. A. M. Mayo, A. B. Thompson, and G. B. Whisenhunt ... 296
Radiation shielding considerations in manned spacecraft design. Sidney L. Russak ... 310

SPACE SCIENCES

Effects of air drag on near-circular satellite orbits. J. Otterman and K. Lichtenfeld ... 513
Solar simulation in space environment. Allan D. LeVantine and Robert P. Lipkis (EN) ... 116

Orbital elements from Doppler tracking of three satellites. Robert R. Newton (EN) 441

SPACE VEHICLES

Range maximization of a surface-to-surface missile with in-flight inequality constraints. Walter F. Denham 78
TIROS preflight testing and postlaunch evaluation. Edwin A. Goldberg 374
Exploitation of inertial coupling in passive gravity-gradient-stabilized satellites. Bruce E. Tinling and Vernon K. Merrick 381
SYNCOM satellite program. Richard M. Bentley and Albert T. Owens 395
Vacuum-air missile boost system. Sudhir Kumar, Jai R. N. Rajan, and James J. Murray 464
Single-plane simulation of a rolling missile. Robert E. Joffs (EN) 215
Possible approach to cross-track radiometric scanning from a cartwheel satellite. William K. Widger Jr. (EN) 427
Landing site coverage for orbital lifting re-entry vehicles. R. G. Stern and S. T. Chu (EN) 429
Approximation of time of ballistic entry. Tom T. Kumagai (EN) 675
Alouette topside sounder satellite: experiments, data, and results. John H. Chapman (EN) 684

SPACE VEHICLE (Launch Vehicles)

Operational flight control for saturn boost vehicles. C. W. Steeg Jr., M. Pesando, and G. Filias 185
Economy of large launch vehicles including orbital labor cost. Krafft A. Ehricke 611
Cost minimization of a space system by multiple launchings. Ralph W. Allen (EN) 112
Rocket vehicle weight trades for injection missions. Richard J. Pollak (EN) 344
Approximate payload capabilities of boosters for planetary missions. Alan B. Baker (EN) 439
Inertia-compensated balance for wind-tunnel buffet measurements. C. V. Stahle, C. G. Stouffer, and W. Silver (EN) 690
Comment on "Cost minimization of a space system by multiple launchings." D. J. Zigrang (TC) 447
Reply by author to D. J. Zigrang. Ralph W. Allen (TC) 448
Further comments on "Cost minimization of a space system by multiple launchings." D. J. Zigrang (TC) 693

SPACE VEHICLES (Spacecraft)

Factors influencing configuration and performance of multipurpose manned entry vehicles. Eugene S. Love (SA) 3
Gemini rendezvous program. James A. Chamberlin and James T. Rose 13
Quadrupedal landing gear systems for spacecraft. Raymond J. Black 196
Approach to space station logistics optimization. Nicholas Kallay 209
Thermal design of the orbiting astronomical observatory. Louis H. Hemmerdinger 477
Studies of touchdown stability for lunar landing vehicles. W. C. Walton Jr., R. W. Herr, and H. W. Leonard 552
Orbital burden rates for manned space missions. H. Hermann Koelle 620
Manned space station orbiting in the Van Allan belt. J. J. Gilvarry and D. H. Sowle (EN) 127
Theoretical vs actual Nike-Apache sounding rocket performance. D. W. Dembrow and L. B. Jamieson (EN) 221
Fin temperature measurements: Nike Cajun sounding rocket. D. W. Dembrow and E. F. Sorgnit (EN) 559

STRESSES AND LOADS

Thermal stresses in an orthotropic, edge-grain-orientated cylinder. William H. Thielbahr 243
Fatigue of aluminum with alclad or sprayed coatings. G. E. Nordmark (EN) 125
Impact force per crater area related to the tensile strength. R. F. Rolsten and H. H. Hunt (EN) 351
Some measurements of the effects of ring baffles in cylindrical tanks. H. Norman Abramson and Luis R. Garza (EN) 560
Buckling of a slender prismatic rod at high impact velocity. Charles W. Bert (EN) 569
Effect of rocket engine vibration on an air-core superconducting magnet. Leroy J. Krzycki, William M. Byrne Jr., and James B. Lee (EN) 680

STRUCTURAL DESIGN

Effectiveness of foam structures for meteoroid protection. S. J. Pipitone and B. W. Reynolds 37
Structural optimization and design based on a reliability design criterion. William C. Broding, F. W. Diederich, and Philip S. Parker 56
Analysis of a nuclear reactor support structure. A. H. Marchertas and G. M. Smith 247
Self-sealing spacecraft structures. James J. Piechocki 270
Design guides for tapered transition sections for pressure vessels. I. W. Dingwell (EN) 115
Design of cylinder-cone intersections. Herbert Becker (EN) 120
